Art Unit: 1792

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 18-38, drawn to a paper machine (*classified in 162/205*).

Group II, claim(s) 39-41, drawn to a coating machine (*classified in 118/300*).

Group III, claim(s) 42, drawn to method (*classified in 427/428.01*).

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature (STF) of Group I is directed to a paper making machine including processing sections such as a wire section, pressing section, and drying section as well as a film press, calendar, and winding or reeling unit. The foregoing STF is present at least in Ahonen et al (US 6,413,371), see col. 44, lines 44 to col. 5, line 8 as evidenced by the submitted International Search Report. Therefore, there is no unity of invention when the STF is present in the prior art. Hence, lack of unity is held by the Examiner under 37 CFR 1.475 and PCT Rule 13.

A telephone call was not made to Applicant to request an oral election to the above restriction requirement, so that Applicant may carefully consider the lack of unity requirement as well as enable Applicant, if so desired, to amend the claimed invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 1792

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura Edwards whose telephone number is (571) 272-1227. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine Norton can be reached on (571) 272-1465. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
